

# Python Environment Setup

First time launch or connect to a new deck

If you are using PyCharm, on top of your project, click **'main'** -> **'Edit Configurations...'**

For **Python interpreters**: choose the same interpreter and environment as the deck file you plan to use.

Then either type “**pip install -r requirements.txt**” in Terminal

```
PycharmProjects\webapp> pip install -r requirements.txt
```

or right-click in requirements.txt file to **Install All Packages**.
